

AT CADMUS, WE DON'T JUST TALK THE TALK

WE STAND BY OUR COMMITMENTS

We track, report, and commit to continually improving our energy consumption across the world via globally recognized disclosure initiatives:

SCIENCE
BASED
TARGETS

DRIVING AMBITIOUS CORPORATE CLIMATE ACTION

Cadmus commits to an emissions target in line with what the latest climate science deems necessary to meet the goals of the Paris Agreement – limiting global warming to well below 2°C above pre-industrial levels.

To reduce Scope 1 GHG emissions 57.2% per square meter of owned or leased office space by 2030*

To reduce Scope 3 GHG emissions 68.7% per dollar of net revenue by 2035

To continue to purchase 100% of our electricity from renewable sources

HOW WE LIMIT OUR ENVIRONMENTAL IMPACT

SUSTAINABLE BUILDINGS

Custom renovations by Cadmus helped Arlington, Boulder, Portland, and Waltham offices achieve LEED ID+C certification.

We prioritize buildings certified under LEED's Building Design and Construction: Core and Shell rating system and/or ENERGY STAR® certified.

ECO-FRIENDLY FEATURES

solar panels

bike benefits

composting

public transportation subsidy

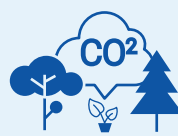

recycling

FOR THE CARBON EMISSIONS WE CAN'T AVOID. . .

We use a mix of on-site generation, utility green power program purchases, and nationally sourced Renewable Energy Credits (RECs).

Together, these add up to 100% of Cadmus' Scope 2 emissions!
